## Professional Summary

Full Stack Web Developer specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in designing and implementing scalable, user-friendly applications with an emphasis on clean code and performance optimization. Passionate about utilizing modern technologies to build high-quality products.

## Technical Skills

**Frontend:** React.js, Redux, JavaScript, HTML5, CSS3, TypeScript, Tailwind CSS, Chakra UI, Shadcn

**Backend:** Node.js, Express.js, MongoDB, RESTful APIs, JWT Authentication

**Tools & Methods:** Git, GitHub, EJS, Responsive Design, Agile Methodology

**Soft Skills:** Problem-Solving, Team Collaboration, Time Management, Communication

## Education

**Full Stack Web Development** — *Prepleaf by Masai* | Aug 2023 - Present

**Bachelor of Science** — *MDS University* | Aug 2021 - June 2024

## Experience

### Frontend Developer Intern | QuadB Tech | February 2025 – April 2025

- Developed dynamic, responsive web interfaces using **React.js**, **Tailwind CSS**, and **Material UI**.
- Designed and implemented **responsive UI components**, ensuring cross-device compatibility and high user engagement.
- Collaborated with backend developers to integrate **EJS views** into React applications, optimizing user experience.
- Optimized front-end performance by refactoring components, reducing render times, and improving load speed.

## Projects

### Internship Project: OWR - E-commerce Platform

**Technologies:** React.js, Redux, Tailwind CSS, Material UI, Node.js, Express.js, EJS

- Designed and developed **Admin Panel Analytics** page with dynamic data, real-time insights, and **data visualization** charts.
- Integrated backend **REST APIs** for fetching live data, providing up-to-date sales analytics.
- Worked on **Product Detail Page theme design**, improving **UI consistency** and optimizing for mobile responsiveness.
- Collaborated with backend teams to manage **state flow using Redux** and ensure data synchronization across the app.
- [Live Link](#)

### SmartTrips - Trip Booking Platform

**Technologies:** React, Redux, Tailwind CSS, Node.js, Express.js, MongoDB, JWT

- Architected and developed a full-stack **trip booking platform**, enabling users to book trips, view details, and manage bookings.
- Implemented **JWT-based authentication** with **role-based access control** for user data security.
- Designed a **mobile-first frontend** using **React** and **Tailwind CSS** for seamless navigation.
- Built scalable **backend APIs** to support advanced search, filtering, and booking capabilities.
- [Live Demo](#) | [GitHub Repo](#)

### Movie Store API

**Technologies:** Node.js, Express.js, MongoDB

- Developed a **RESTful API** for movie management, incorporating **filtering**, **sorting**, and **pagination** functionality.
- Designed efficient **MongoDB schemas** to scale with increasing movie data.
- Integrated **custom validation middleware** for improved error handling and API reliability.
- Created detailed **API documentation** to assist frontend teams with integration.

### Amazon Clone - E-commerce Platform

**Technologies:** React, Redux, JavaScript, Tailwind CSS

- Built a responsive e-commerce platform with **cart management**, product listings, and **dummy checkout simulation**.
- Managed global **state with Redux** to handle product selections, cart management, and checkout flow.
- Implemented **mobile-first design** with **Tailwind CSS** for better user experience on all devices.
